

SOFTWARE ENGINEER

Jorge H. Neyra-Araoz

I build Java and Spring Boot microservices and integrations on AWS — from concept to release.

Software engineer at idealo in Berlin, building Java and Spring Boot microservices on AWS (EKS) with Kafka, Docker and infrastructure as code (Terraform, Pulumi). Since 2006 I have built and architected Java/Spring platforms, cloud integrations and connectors across Peru, Brazil, Chile, the USA and Germany.

Profile

I work across the whole software development process — design, architecture, testing and maintenance — through to the final release, with an emphasis on code quality: clean code, SOLID principles and design patterns.

At idealo I own my projects end to end and build Java and Spring Boot microservices running on AWS EKS, with Kafka, Docker, infrastructure as code (Terraform, Pulumi), Grafana and React, as well as integration, workflow and Salesforce solutions for the commerce division. Before that I designed the architecture of cloud platforms built on Spring, RabbitMQ and the Microsoft Graph APIs, and a bi-directional Salesforce–JIRA connector.

Work experience

Jan 2020 – present
Software Engineer
idealo internet GmbH Berlin, Germany

Microservices in Java and Spring Boot on AWS (EKS), with Kafka, Docker and infrastructure as code (Terraform, Pulumi).

- End-to-end technical ownership: managing projects from requirements analysis and solution design through implementation, deployment, maintenance and support.
- Microservices development: services built with Spring Boot on AWS EKS, integrated through Kafka, monitored with Grafana and covered by automated JUnit tests. Front-end development with React.
- Architecture and integration: design and development of integration and workflow management solutions for applications in idealo's commerce division.
- Salesforce development: implementation and maintenance of Salesforce solutions for B2B business processes.

2017 – 2019
Senior Java Developer
RetailCompass Santiago, Chile

Data team: Java development on AWS (Amazon RDS, among others), from data extraction to the APIs other teams consume.

- Data extraction with web crawlers.
- Ingestion of the extracted data into the database.
- REST endpoints in Spring Boot so other teams could use the data.

Apr 2008 – Dec 2019
Senior Software Architect · Software Development Consultant
zAgile, Inc. California, USA (remote)

> **Nuvolex Cloud Platform** Sep 2015 – Dec 2019
>
> Senior Software Architect
>
> Software architecture of a platform that processes data through PowerShell cmdlets for Exchange, Azure AD Graph and Microsoft Graph, for Exchange Online, Office 365, Microsoft Teams and Intune.
>
> - Spring Cloud, RabbitMQ cluster, Java web application (Spring, JPA, RESTful).
> - C# application with PowerShell, Office 365 and Azure Graph API.

zAgileConnect for JIRA Jan 2014 — Sep 2015

Senior Software Development Consultant

Defined and built the initial architecture of a bi-directional Salesforce–JIRA connector, using JIRA plugin development (Java, REST API) and Salesforce technologies (Apex, SOQL, Visualforce, JavaScript) on Heroku.

Nuvolex Platform Dec 2011 — Dec 2013

Senior Software Development Consultant Client: Nuvolex, Inc.

Designed the initial architecture of a platform integrating cloud services (Office 365, Amazon EC2, etc.) with Spring Boot, Spring MVC, REST, JPA, MongoDB, a MySQL cluster, Hogan.js and Mustache.js.

JasperReports NoSQL Connectors Apr 2011 — Oct 2011

Software Development Consultant Client: JasperSoft

Research and proofs of concept integrating JasperReports with big data technologies such as MongoDB, CouchDB, Neo4j and Riak.

Wikidsmart Apr 2008 — 2011

Software Development Consultant

Connectors between zCALMServer (an ontology engine) and wikis (Confluence), issue tracking (JIRA), CRM (Salesforce), version control (Fisheye/Crucible, SVN) and portals (JBoss Portlets).

Apr 2007 — Jan 2008

Researcher and Software Developer — Chinchilla HR system

Assembleia Legislativa de São Paulo (ALESP) São Paulo, Brazil

Research, maintenance and development of the Chinchilla web system with agile methodologies and Java (JSP, Struts, Servlets, Tomcat), through Fundação de Apoio à Universidade de São Paulo.

Jan 2006 — Jan 2007

Java Developer — Cyberdoc workflow system

Handel-Soft S.A.C. Arequipa, Peru

Workflow system for document management in public institutions in Arequipa.

Sep 2006 — Dec 2006

Developer — Web registration and notification system

Peruvian Computer Society Arequipa, Peru

Registration and notification system for the Jornadas Peruanas de Computación, built with PostgreSQL, Perl, HTML and JavaScript (AJAX).

Technical skills

programming	Java, TypeScript / JavaScript, Python, Bash, C#, C/C++…
frameworks	Spring Boot, Spring Cloud, Spring WebFlux, JPA / Hibernate, React, Angular…
cloud & data	AWS (EKS, SQS, RDS), Docker, Terraform, Pulumi, Kafka, PostgreSQL, MongoDB…
others	Salesforce (Apex, SOQL), Grafana, JUnit, Mockito, Git, Maven, Gradle, Linux…

Education

Graduate studies in Computer Science 2007 — 2009

Universidade de São Paulo São Paulo, Brazil

Bachelor in Systems Engineering (Computer Science) 2001 — 2005

Universidad Nacional de San Agustín Arequipa, Peru

Recognitions and awards

Jun 2006	3rd place in Systems Engineering, 2001 cohort
Nov 2004	Second place in Peru, ACM-ICPC Regional Contest 2004
Dec 2003	Recognition for contributing to the development, image and strengthening of the Production and Services Engineering School on its 20th anniversary · Arequipa, Peru

Programming contests

Nov 2010	Coach, ACM-ICPC Regional Contest 2010 · Lima, Peru
Jun 2007	Contestant, Maratona de Programação da USP 2007 · São Paulo, Brazil
Nov 2005	Contestant, ACM-ICPC Regional Contest 2005 · Lima, Peru
Sep 2005	Contestant, Google Code Jam 2005
Nov 2004	Contestant, ACM-ICPC Regional Contest 2004 · Arica, Chile
Nov 2003	Contestant, ACM-ICPC Regional Contest 2003 · Chillán, Chile

Teaching

Laboratory instructor (part-time), Software Engineering 2012 – 2017

Universidad Católica San Pablo Arequipa, Peru

Teacher, "Seminario Taller LP-Java" workshop Jun 2006

Universidad Néstor Cáceres Velásquez Juliaca, Peru

Languages

Spanish	Native
English	Advanced
Portuguese	Fluent
German	Intermediate

Interests

Culture and learning	I enjoy walking around the city, discovering new places and reading about psychology to learn and better understand human behaviour.
Sport and wellbeing	I like doing light sports at weekends to stay active and switch off from the routine.
Music	I like spending time on music, especially playing guitar and keyboard, as a form of expression and personal learning.
